<sup>1</sup> On sorting strings in external memory (extended abstract)

Lars Arge, Paolo Ferragina, Roberto Grossi, Jeffrey Scott Vitter

May 1997 **Proceedings of the twenty-ninth annual ACM symposium on Theory of computing**

Full text available:  pdf(1.38 MB)

Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

<sup>2</sup> 1 - Regular Articles: Cache-conscious sorting of large sets of strings with dynamic tries

Ranjan Sinha, Justin Zobel

December 2004 **Journal of Experimental Algorithmics (JEA)**, Volume 9

Full text available:  pdf(848.84 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Ongoing changes in computer architecture are affecting the efficiency of string-sorting algorithms. The size of main memory in typical computers continues to grow but memory accesses require increasing numbers of instruction cycles, which is a problem for the most efficient of the existing string-sorting algorithms as they do not utilize cache well for large data sets. We propose a new sorting algorithm for strings, burstsort, based on dynamic construction of a compact trie in which strings are ...
